

**With the new success of a Private Placement
with European investors, DOLFINES continues to strengthen
its industrial and commercial capacity**

DOLFINES, an independent specialist in engineering and services for the renewable and conventional energy industry, today announced that it has successfully completed a Private Placement of 300,000 new common shares with qualified European investors through of an accelerated bookbuilding process for a total gross amount of €660,000 in order to continue to strengthen its industrial and commercial capacity at a time of strong structuring of the floating wind market.

Jean-Claude Bourdon, President and founder of DOLFINES, participated in the capital increase.

Jean-Claude Bourdon, President and Founder of DOLFINES, said: « *This third fundraising in less than two months for a cumulative gross amount of €2.12 million with, at each transaction, a higher issue price, saturates the authorization given by the General Assembly of June 25, 2019. Its success reflects the market's strong confidence in DOLFINES' ability to carry out its value creation project for major players in the huge renewable energy market, including the production of green hydrogen. These funds will enable the development of the design of our semi-submersible platform to be intensified to wind turbines of 15 MW and over, which will be the standard of the floating wind market in the coming years, and to optimally position DOLFINES and its partners on the major tenders that will be launched from this year.* »

Key terms of the transaction

The capital increase of DOLFINES ("The Company") was achieved by issuing common shares with the removal of the preferential subscription right at a price of €2.20 per private placement for qualified investors, in accordance with Article L.411-2 II of the Monetary and Financial Code. It is based on the 15th resolution of the Company's Mixed General Meeting of Shareholders dated June 25, 2019 setting the maximum discount limit at 30% relative to the average price weighted by the Company's share volumes during the last ten trading days prior to the issuance price. On this basis, the discount on the issued shares is 22%.

As an indication, the interest of a shareholder holding 1% of the Company's share capital prior to the issue will be 0.97% after the issue.

CHAMPEIL SA has acted as Lead manager and Bookrunner for the operation.

Admission of new shares

New shares issued as part of the capital increase will be of the same category as existing shares. The settlement-delivery of the new shares and their admission to the Euronext Growth Paris market under the code FR0010377127 - ALDOL are scheduled for January 12, 2021 (subject to customary market conditions). The new shares will rank for dividend and will be immediately assimilated to existing shares as of their issuance.

At the end of the settlement-delivery, DOLFINES' share capital will consist of 9,572,774 shares with a par value of €1, or €9,572,774.

In accordance with the provisions of Article L.411-2 II of the Monetary and Financial Code and the General Regulations of the Financial Markets Authority, it is recalled that the capital increase by issuing common shares with the removal of the preferential right of subscription of shareholders by private placement carried out for the benefit of qualified investors has not given rise to, nor will it give rise to, the publication of a prospectus subject to the financial markets authority's visa.
